**“Mayor Schneider Announces Pavement
Resurfacing for New Florissant Road”**

Mayor Thomas P. Schneider announced a major upcoming project to overlay the pavement on New Florissant Road from Washington Street to Highway 270. The project will include overlaying the existing pavement with an ultra-thin bonded asphaltic concrete wearing surface. Additionally, the existing pavement will be milled at the ends of the work zone. St. Louis County Highways & Traffic Department is managing the project which also includes improvements to several other highly traveled roads in St. Louis County. The project, valued at approximately \$1.8 million, has been awarded to N.B. West Contracting Company, Inc.

The improvements will provide residents a safer and smoother ride as well as enhance the appearance of one of the City's most traveled routes. The milling work is anticipated to begin late July or early August while the paving work is slated for late August or early September, weather permitting. Resident's along the work zone will receive written notification prior to the start of work from N.B West within the next couple of weeks. To reduce travel delays, the majority of the work will be performed at night and the ultra-thin overlay will allow the lanes to be opened for traffic almost immediately following completion of the work.

Questions or comments may be directed to St. Louis County Highways & Traffic Department at (314) 615-8504.
