

Project Spotlight

PUT YOUR BUSINESS IN THE SPOTLIGHT

Project Spotlight is an initiative that focuses on the safety of our residents by promoting the deterrence of criminal activity with the use of operational surveillance cameras inside and outside of local businesses. This commitment from the business community will help the Florissant Police Department combat crime, and more importantly assist in the apprehension of suspects through the use of surveillance equipment.

Our intention with Project Spotlight is to encourage participation with our local businesses to provide the safest opportunities to your customers. The City of Florissant is encouraging all businesses to have operational surveillance cameras inside and outside of their business. Project Spotlight will not only benefit the business, but it will also give the Florissant Police Department another tool to combat crime.

There have been instances where surveillance equipment outside a business could have provided law enforcement with some key information in solving crimes. Installing surveillance equipment on the outside of your business is taking that extra step to ensure your business is serious about protection and crime deterrence.

The Florissant Police Department wants all business owners to know that this initiative is intended to promote and preserve public health, safety and welfare, and by working in conjunction with the police department, it strengthens your commitment to keep The City of Florissant a safe community.

Participating businesses will receive a certificate of appreciation from Mayor Schneider and Chief Lowery and a sign to display that reads;

“THIS BUSINESS IS IN THE SPOTLIGHT!”
